Comprehensive Industrial Asset Inspection Solution Featuring Automated Defect Detection

Automated, scalable solution with immediate ROI

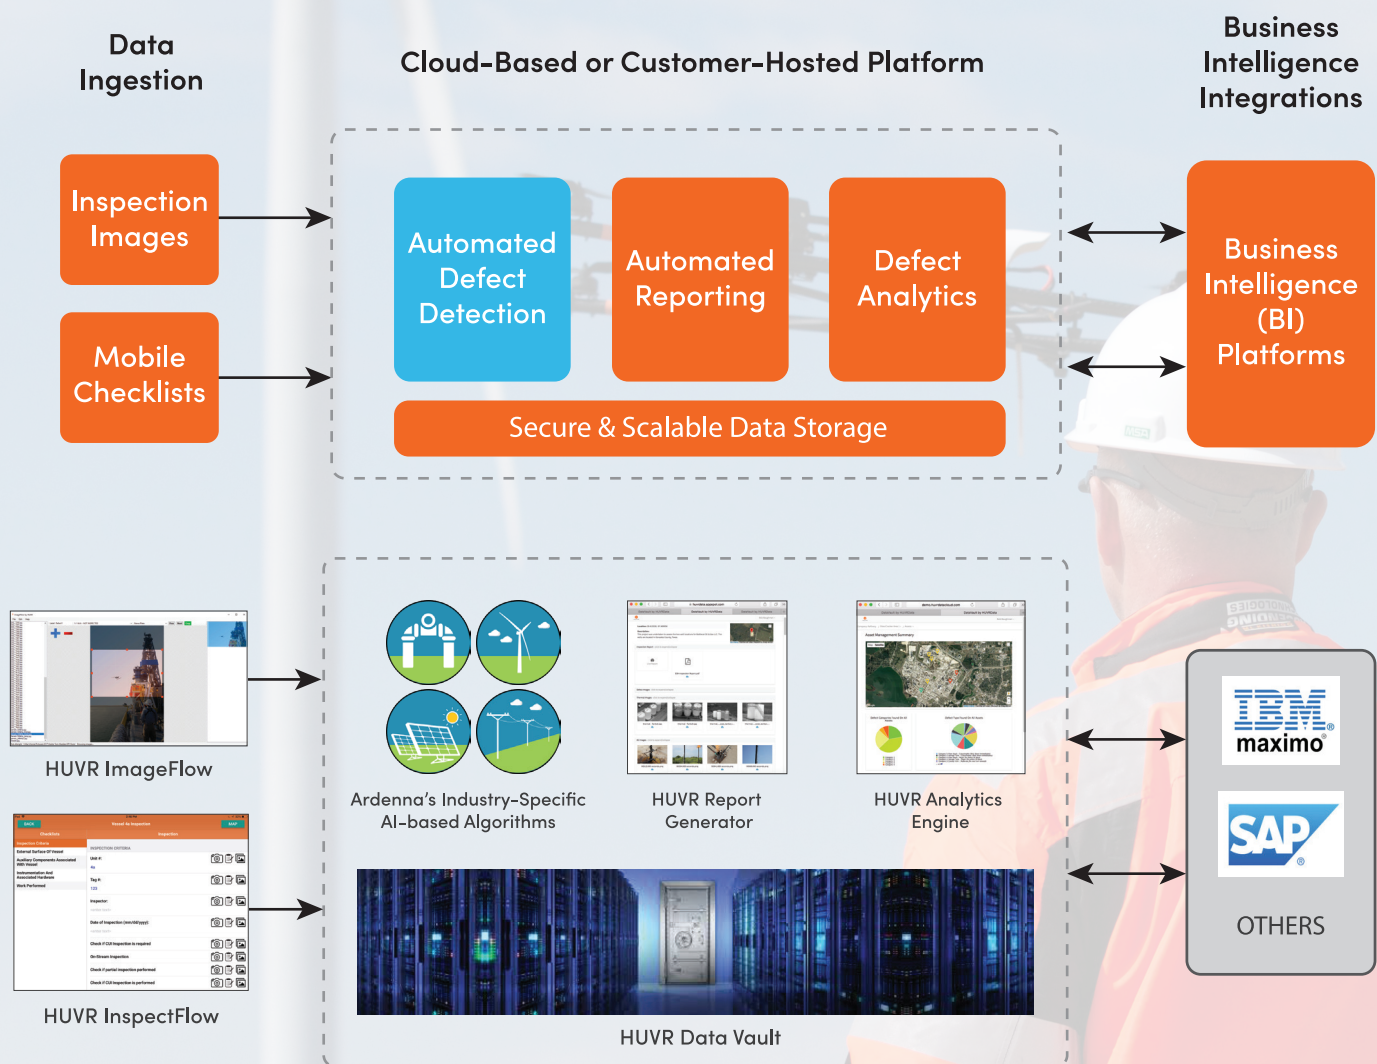

Problem

- Manual inspection process
- Massive data files that are not integrated
- Process does not scale
- Costs to grow become unsustainable

Solution

- Digitized and mobile inspection checklists
- Data stored in secure, client-structured database
- Automated defect detection
- Automated defect labeling to client standards
- Client-defined report formats
- Comprehensive defect diagnostic analytics
- Integrated to existing Business Intelligence (BI) processes
